Note on Wool Industry Education Initiative

In the latter part of 2014 your NZCWA directors became increasing concerned as rumours abounded that Tectra was no longer going to be in a position to offer courses in wool industry training. While Tectra informed the NZWCA board in early November that it was working hard to find a new home for the CWT and CWTC courses, run out of Massey by Laurie Boniface, there was a subsequent lack of communication. We became worried that Tectra may not be able to find an acceptable solution. As a result your Chairman, Bill Dowle, spoke with leaders of other sectors in the industry who had also been reliant on the CWT and CWTC courses to see if there was a willingness to combine to address this issue given the possibility that Tectra may not be able to find an acceptable solution. As it turned out a number of these leaders had already been in discussion with each other so there was a lot of goodwill to find a solution.

Recruitment of good people and provision f relevant training and education has always been important to the industry and is even more relevant today with the Minister for Primary Industries, Nathan Guy, having set a target for the value of agricultural exports to double by 2025.

As a result Bill convened, in early February, a widely representative workshop to address the future of the CWT and CWCT courses and wider wool industry education issues. Those at the meeting were from scourers, shearing contractors, marketers, brokers, researchers and educationalists as well as a good turnout from your Association.

Those attending were made aware that Tectra had just advised that they were continuing to try and find a new educational organisation to host the CWT/CWCT courses and were given an update on discussions which had been initiated by Tectra with Lincoln University/Telford.

The Group agreed there was a need to take a comprehensive look at wool industry education and agreed on the following as guidelines:

- 1. Formation of an umbrella entity for skills and training Provision of Leadership
- 2. A unified course or courses that suit the whole industry
- 3. People currently enrolled in the CWT course need to be supported
- 4. A Plan B needed to be in place if Tectra and Telford/Lincoln fails
- 5. Education/Training must be supported by best governance desirably with industry involvement & assured funding

The Group decided to name itself the Wool Industry Education Group (WIEG) It formed a subcommittee to define industry education needs, irrespective of possible providers It agreed to advise Telford/Lincoln of this meeting and of industry's willingness to take a responsible and collaborative approach including endeavouring to ensure support continues for current CWT/CWTC students

The members of the sub - committee are: Nigel Hales - CEO Cavalier Wool Scourers Mavis Mullins - Shearing Contractor Bill Dowle - NZWCA Derrick Millton - Chair WRONZ Jackie Donald – The NZ Merino Company Craig Smith – PGG Wrightson Bruce Abbott - NZWCA Allan Frazer – NZWCA - Facilitator

The sub-committee set the following Terms of Reference:

<u>Terms of Reference to develop a comprehensive Wool Industry Education and Training</u> Strategy

- 1. Review education/training currently and recently provided in the sector
- 2. Define education/training needs in broad terms from perspective of each sector eg scourers, brokers, classers from Cadet to Senior management
- Define education/training required pre-workforce entry eg in schools part of an approach to change perceptions of career opportunities in the sector leading to enhancing recruitment
- 4. Assess if there are any learnings from other wool producing countries eg Australia
- 5. From above identify gaps and consider options on filling gaps and actively work with industry, government and education organisations to plug gaps in existing programmes and if relevant to introduce new programmes

To date the committee has:

- Received advice from LincolnFirst Telford that they expect a decision any day now on their taking over the CWT CWTC training and that Laurie Bonniface will continue as Tutor
- Lincoln Telford have agreed to involve the sector in a review of course content and selection criteria
- Been made aware that some industry support has been provided to Laurie Bonniface to enable him to continue supporting current CWT CWTC students
- Drafted a document setting out all wool industry related education provided in NZ
- Defined Needs as advised by committee members both skill and attitude needs wanted from employees along with skill needs
- Met with Lincoln Telford with the intent of supporting them in exploring provision of more
 extensive wool industry education to all students as well as more course options for
 students wishing to gain a wool specific tertiary qualification at diploma and degree level
- Sought broad industry endorsement by inviting support and endorsement from the NZ National Council of Wool Interests
- Arranged to meet again with Lincoln Telford in early June to explore a Terms of Reference to establish a Wool Industry Advisory Group to Lincoln University
